15TH RoomVent Conference

Energy efficient ventilation for healthy future buildings

Torino - Italy, 14-17 February 2021

RoomVent 2020 will be focused on the theme “**Energy efficient ventilation for healthy future buildings**” and invites participation and paper submission across a broad range of **MAJOR TOPICS**:

Numerical models for ventilation and measurement techniques
Air distribution & ventilation efficiency
IAQ and thermal comfort
New technologies for ventilation
Ventilation design tools and building information modelling

Special topics:

Ventilation for means of transport (cars, airplanes, ships, boats, trains...)
Urban ventilation and outdoor pollution
Fire and smoke control simulations
Ventilation of underground space environments
Ventilation for infection control
Respiratory personal protection equipment (ppe)
Hygiene in working environments
Ventilation for infection control **New**
Respiratory Personal Protection Equipment (PPE) **New**
Hygiene in working environments **New**
