Aereco joins Eurovent as newest Corresponding Member

Brussels, Marne la Vallée, 10 May 2022. Aereco, one of France's leading manufacturers of hybrid and mechanical ventilation systems has been formally approved to join the Eurovent family during a recent online meeting of the association's Board of Directors.

Headquartered in Marne la Vallée, France and with offices around Europe, Asia and the USA, Aereco develops innovative ventilation solutions for residential and office buildings. Their systems fully meet the current building challenges with regard to energy efficiency and indoor air quality. Aereco offers several lines of products that can be implemented in various systems, from natural and hybrid ventilation to mechanical exhaust and heat recovery ventilation.

Mr Quentin Liebens, Aereco's R&D Project Manager and Public Affairs Manager remarked: "Certain buildings (residential or non-residential) require different ventilation systems, and it is essential to come up with the appropriate technical solution for each building in order to have the best balance between a good indoor air quality and effective building performance. We are certain that by joining Eurovent, we will work together in showing the importance of efficient ventilation systems in our buildings for good indoor air quality and effective building performances. We look forward to working well with Eurovent."

Is your organisation interested in becoming a member of our globally known industry association? All relevant information is available at www.eurovent.eu. In case of any questions, contact the Eurovent Team via secretariat@eurovent.eu.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The **more than 1.000 manufacturers within our network** (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
