UL Solutions is BridgeBuilding Partner of 2022 Eurovent Summit Brussels, Carugate, 19 July 2022. UL Solutions, a global service provider to the HVACR industry and beyond, has become an official BridgeBuilding Partner (sponsor) of the 2022 Eurovent Summit taking place from 25 to 28 October in Antalya, Turkey.

[UL Solutions](#) is a global leader in applied safety science. The organisation transforms safety, security, and sustainability challenges into opportunities for customers in more than 100 countries. UL Solutions delivers testing, inspection, and certification services, together with software products and advisory offerings, that support customers' product innovation and business growth.

UL Solutions will assume an active role in the Summit's flagship event [Eurovent Innovation/HUB](#) focused on **#BuildingBridges** between innovation and sustainability. Mr Dustin Steward, Director and Global Industry Lead for Appliances, HVAC, and Components at UL Solutions, will contribute to the event with a keynote speech dedicated to lower GWP refrigerants.

In this respect, Steward remarked: "While low GWP refrigerants are more environmentally friendly, manufacturers must be mindful of the additional layers of risk involved in their use. As a leading independent safety science organisation, UL Solutions has conducted extensive research on flammable refrigerants and has developed thorough expertise to support manufacturers during the design of their next-generation products." Steward highlighted that, "among UL's available services in fact, there is the unique Modelling and Simulation programme that helps us to predict flammable refrigerant behaviour in circuits and potentially critical areas. Through this advanced analysis, manufacturers can lower the number of physical prototypes needed for certification tests. On top of that, a faster assessment of product design revisions meets both environmental and process acceleration issues that manufacturers committed to sustainability are pursuing."

This year's **EUROVENTSUMMIT** is co-organised with [ISKID](#), the Turkish Air Conditioning and Refrigeration Manufacturers' Association. It aims at **#BuildingBridges** between manufacturers and consultants, planners, installers, trade associations and policymakers between Europe, the East and beyond, toward more sustainable and circular products and a more socially and environmentally responsible industry.

Among other activities, participants can look forward to a rich seminar programme focused on both ventilation and refrigeration organised by ISKID and [TTMD](#) (Turkish Society of HVAC and Sanitary Engineers) with involvement from UL Solutions in English and Turkish. There will also be an interactive policy panel on the first night, which will connect many different stakeholders in the industry. Stay tuned for updates on the speakers and the soon-to-be-launched registration via www.eurovent-summit.eu and the [Eurovent LinkedIn page](#).

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
