New Recommendation for A-A Process and IT Cooling

Brussels, 16 July 2024. The Eurovent Product Group 'Air Conditioners' (PG-AC) has released a new recommendation on the rating points for air-air process and IT cooling. The recommendation is ready for download on the Eurovent website.

The new Eurovent Recommendation 11/1 proposes a new definition and two methodologies to address the air-air process and IT cooling in the context of the revision of the Ecodesign Regulation (EU) 2016/2281. The definition and the methodologies derive from the existing Regulation or the existing standard EN 14825. The Recommendation illustrates that all IT cooling or close control air-air air conditioners should be addressed under the Regulation that will replace the existing (EU) 2016/2281 regardless of the capacity.

Massimiliano Ferrario, Secretary of the Eurovent PG-AC, stated: "Through collaborative efforts among the different companies, the Eurovent Product Group 'Air Conditioners' achieved this important result in a rising market that still needs to be regulated, such as IT cooling. This well exemplifies Eurovent's strength in uniting the industry and shaping the future. This approach is a win-win situation since the industry can identify and propose initiatives and then cooperate with the legislator for a regulation that benefits all parties involved."

This document was published by Eurovent and was prepared in a joint effort by participants of the Product Group 'Air Conditioners' (PG-AC), which represents a vast majority of all manufacturers of these products active on the EMEA market. The document can be downloaded free of charge in the Publications section on the [Eurovent website](https://www.eurovent.eu).

About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, businesses, and the environment.
