Eurovent has released its 2024-2029 Manifesto

Brussels, 07 May 2024. Eurovent has released its 2024-2029 Manifesto, which means to unlock the potential of the European HVACR industry to contribute to a sustainable future, quality of life, decarbonisation, and sustainable growth and employment in Europe.

The Eurovent Manifesto rests on three essential recommendation pillars to policy makers from the European Commission, European Parliament and 27 Member States for the 2024-2029 legislative term. Firstly, Eurovent advocates for the creation of a frictionless Single Market for sustainable products, based on a common European methodology for assessing product sustainability.

Secondly, Eurovent recommends to swiftly implement European Green Deal policies, to create legal certainty and predictability so that the HVACR industry can adapt and make the necessary investments to develop, scale production, and bring to market the technologies that will deliver decarbonisation.

Thirdly, Eurovent draws attention to the need for policymakers to develop a real and forceful European industrial strategy that addresses labour shortages, supply chain risks, and regulatory burden, among other aspects, all understood in their global economic context.

Eurovent Secretary General Francesco Scuderi elaborated: “The Manifesto is meant to draw the attention of policymakers to the challenges and opportunities our industry is facing. If these can be addressed with appropriate policy responses, it would unlock the potential of our industry to contribute to a sustainable future, including quality of life, decarbonisation, and sustainable growth in Europe and globally, in line with the United Nations Sustainable Development Goals.”

The full Manifesto document can be downloaded from the [Eurovent website](https://www.eurovent.eu).

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
