Kranenberg and Vit to chair PG-AC for another term

Brussels, 18 June 2024. During the online meeting of the Eurovent Product Group 'Air Conditioners' (PG-AC) on 05 April, the participants re-elected Henk Kranenberg as Chairperson and Stefano Vit as Vice-Chairperson of the group for another term.

Henk Kranenberg (Senior Manager, Daikin Europe) is an expert in heating ventilation, air conditioning, refrigeration and building environment. He will be taking up his second term as the Chairperson of the group. He will be supported by Stefano Vit (HVAC Laboratory Manager, De'Longhi), who has more than two decades of experience in the HVAC industry. They will both chair the Product Group for the next two years.

Stefano Vit, PG-AC Vice-Chairperson, stated: "Europe will need to transform to achieve the EU's goals for net-zero emissions. This is challenging but will unlock societal benefits and business opportunities. Despite these challenges, the EU's built environment needs to make a broad range of changes to meet decarbonisation targets. In this regard, the setup of suitable regulations for air conditioning and heat pumps has a remarkable relevance. I am pleased to provide my contribution to the PG-AC which plays a key role in this context. It is an honour to continue the work with Mr Kranenberg and the PG-AC members."

The Eurovent Product Group 'Air Conditioners' covers air conditioners and variable refrigerant flow (VRF) units. It is engaged with European and national legislation regarding the European air conditioning industry. It is also concerned with the development of EN, ISO and Eurovent standards and deals with the general promotion of the industry.

About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, business, and the environment.
