Eurovent publishes new air curtain Recommendation

Brussels, 24 September 2024. The Eurovent Product Group 'Air Curtains and Fan Heaters' (PG-CUR) has published a new Recommendation 16/4 on the classification and correct positioning of an air curtain unit.

The Recommendation provides the common classification of air curtain units and guidance and best practice for their correct positioning. Particularly, this recommendation focuses on the application of air curtain units and correct application to revolving doors or entrance lobbies. It further gives details on commercial and industrial air curtain units and all of their properties.

Mr Xander Van Bree, Vice-Chairperson of PG-CUR, mentioned: "We are pleased to have finalised this Recommendation, guiding our industry, customers, and authorities on the various types of air curtains, their functionality, optimal positioning, and the energy savings they offer. This achievement reflects the collaborative efforts of the industry, and I am proud of the outcome. It also forms the foundation for the energy performance calculation tool, which is still under development."

The Eurovent Product Group 'Air Curtains and Fan Heaters' covers air curtain units for commercial, industrial, and cold storage purposes and fan-driven heating and/or cooling products. It is the largest group of air curtain unit and fan heater manufacturers worldwide and is supported by Eurovent Member Associations on a national level. This Product Group is involved in the advocacy of European and national legislation, EN, ISO, and Eurovent standards, general promotion of the industry, export initiatives, and diminishing of unfair trade barriers inside and outside Europe. The document can be downloaded free of charge on the [Eurovent website](https://www.eurovent.eu).

About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, businesses, and the environment.
