Eurovent India elects new Chairpersons

Brussels, Mumbai, 08 October 2024. Concluding its first two years of establishment, the local Working Group of Eurovent members and certified manufacturers active in India have elected new Chairpersons to steer the group's activities for the next two years.

Eurovent India members gathered in Mumbai for its Annual Meeting, which was followed by a technical workshop titled 'Energy Efficient Indoor Air Quality Solutions', that welcomed almost 200 professionals from various industries. The event highlighted the strong interest in technical presentations on improved energy efficiency in ventilation and Indoor Air Quality (IAQ), one of the group's major focal areas. During the Annual Meeting, Mr Alok Bhardwaj, Vice President of Systemair India, was elected as Chairman, taking over this role from Mr Devraj Singh, Managing Director of FlaktGroup Asia. The new Chairperson will be supported by Mr Anil Chopra, Head of Regulatory Affairs of Camfil India, as Vice-Chairman.

Mr Alok Bhardwaj, stated: "I am honoured and excited to take on this role on behalf of our members. India looks forward to a massive expansion of infrastructure and strong economic growth, which will come with huge challenges to meet energy demands and reduce carbon emissions. The collaborative work by Eurovent India is an essential contribution to help this country achieve its development goals and energy efficiency targets."

Mr Markus Lattner, Eurovent International Director, added: "Our sincerest appreciation goes to Mr Devraj Singh, who has been an excellent chairman and whose active contribution was essential in the establishment of the group. Building on the successful foundation of the first two years, I am looking forward to seeing the next steps taken under Alok's leadership."

Eurovent India is a collaborative effort of Eurovent members and Eurovent certified manufacturers interested in contributing towards sustainability, energy efficiency, better IAQ, and the development of higher standards in the country. By raising awareness of common problems and highlighting technical solutions, its participants provide important knowledge and expertise to reduce energy consumption and the adverse effects of substandard HVACR installations.

About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, businesses, and the environment.
