Eurovent welcomes first member from Ireland

EDPAC joins Europe's HVACR industry association

Carrigaline, Brussels, 9 July 2018. Following an official approval by the Eurovent Board of Directors on 6 July 2018 in Brussels, EDPAC has formally joined the Eurovent Association. The manufacturer of innovative air conditioning equipment for critical applications becomes Eurovent's first member from Ireland.

EDPAC has been associated with computer room air conditioning since 1968, having originally been an abbreviation for Electronic Data Processing Air Conditioner. EDPAC's operations in Ireland service the markets of Europe, the Americas, the Middle East, and the Far East. Having pioneered the original concepts, its name is synonymous with quality and reliability in a world, where processing and electrical technologies are applied in critical applications.

Noel Lynch, Managing Director of EDPAC, states: "EDPAC has been operating in Ireland for over 30 years, supplying air handling and close control equipment to Ireland, Europe, the Middle East and South America. Eurovent shines a light that seeks to enhance both product quality and standards within the industry, providing confidence to our clients, customers, and the market as a whole. While our products are well proven within the data centre and commercial air handling sectors, we look forward to a close association with Eurovent and are delighted to be the 1st family member from Ireland."

With the joining of EDPAC, Eurovent now represents more than 1.000 associations and manufacturers from 27 countries. For more information on our members, visit www.eurovent.eu.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

Eurovent's roots date back to 1958. Over the years, the Brussels-based organisation has become a well-respected and known stakeholder that builds bridges between manufacturers it represents, associations, legislators and standardisation bodies on a national, regional and international level. While Eurovent strongly supports energy-efficient and sustainable technologies, it advocates a holistic approach that also integrates health, life and work quality as well as safety aspects. Eurovent holds in-depth relations with partner associations around the globe. It is a founding member of the ICARHMA network, supporter of REHVA, and contributor to various EU and UN initiatives.

Our Members and 'Affiliated Manufacturers'

Our Members are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate, Process Cooling, and Food Cold Chain technologies.

The more than 1000 companies within their networks (Eurovent 'Affiliated Manufacturers') can directly participate in Eurovent activities in a democratic and transparent manner.

For in-depth information and a list of all our members, visit www.eurovent.eu

Democratic decision-making

DEMOCRATIC DECISION-MAKING

 Activities rest upon democratic decision-making procedures between members and their representatives

 'Umbrella association' structure ensures broad and truly credible representation of our industry vis-à-vis policy makers

 Voting rights independent from amount of membership contributions or company sizes
