## Eurovent publishes Guidebook on Air Handling Units

**Publication contains everything you need to know about the heart of a ventilation system**

**Brussels, 2 October 2018. The Eurovent Association's Product Group AHU has just published the first release of its Guidebook on Air Handling Units. On 53 pages, the free-of-charge publication provides all essential information on this important piece of technology in a hands-on and neutral manner.**

The Eurovent AHU Guidebook provides, for instance, valuable information on application areas, functions and components, energy efficiency and life-cycle costs, control system, design and selection, certification, as well as standards. It is not only targeted at producers, but of equal relevance for consultants, planners, architects, testing agencies, and everyone else having to deal with Air Handling Units in their everyday life.

Martin Lenz of Trox GmbH, Chairman of the Eurovent Product Group AHU, states:

"The publication of the new Guidebook constitutes yet another milestone in the history of our Product Group. I think that my colleagues and I can confidently state that this is the most comprehensive and all-encompassing guidebook on air handling units published to date. Our goal was to create a non-academic, concise, and easy to read publication that enables readers to better understand the heart of a ventilation system."

Morten Schmelzer, Executive Director at the Eurovent Association and Secretary of the Product Group added:

"It was of specific importance for us to highlight the state-of-the-art in technological development while raising awareness on core aspects such as life-cycle costs, design and selection. We want readers to be able to make an unbiased assessment of what defines a high-quality air handling unit and why, for instance, the initial price should not be the main purchasing argument. On behalf of Eurovent, I would like to thank all participating members for their support in creating this unique Guidebook throughout the past 12 months. As it also happens to be my birthday today, I could not imagine a better present."

The Eurovent Guidebook 'Air Handling Units' can now be downloaded in the Document Web Shop at [www.eurovent.eu](http://www.eurovent.eu). The Guidebook will be regularly updated with the aim to cover an increasing number of regions and application areas. The Eurovent Product Group AHU is happy about any feedback or requests, which can be directed to [secretariat@eurovent.eu](mailto:secretariat@eurovent.eu)

## About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

Eurovent's roots date back to 1958. Over the years, the Brussels-based organisation has become a well-respected and known stakeholder that builds bridges between manufacturers it represents, associations, legislators and standardisation bodies on a national, regional and international level. While Eurovent strongly supports energy-efficient and sustainable technologies, it advocates a holistic approach that also integrates health, life and work quality as well as safety aspects. Eurovent holds in-depth relations with partner associations around the globe. It is a founding member of the ICARHMA network, supporter of REHVA, and contributor to various EU and UN initiatives.

## Our Members and 'Affiliated Manufacturers'

Our Members are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate, Process Cooling, and Food Cold Chain technologies.

The more than 1000 companies within their networks (Eurovent 'Affiliated Manufacturers') can directly participate in Eurovent activities in a democratic and transparent manner.

For in-depth information and a list of all our members, visit [www.eurovent.eu](http://www.eurovent.eu)
