Filip Konieczny (FLOWAIR) new chairman of Product Group 'Rooftop Units'

Eurovent PG-RT's Vice-Chairman is Alberto Bellù (Mitsubishi Electric Hydronics & IT Cooling Systems S.p.A.)

Brussels, 24 November 2020. Eurovent's recently launched Product Group 'Rooftop Units' (PG-RT) has elected its first Chairman and Vice-Chairman during its second meeting on 16 November 2020. The Group's Chairman is Mr Filip Konieczny (Ventilation and Air Conditioning Manager / Export Technical Specialist at FLOWAIR). He will be supported by the PG-RT Vice-Chairman Mr Alberto Bellù (Product Manager Rooftop & Air Handling Units at Mitsubishi Electric Hydronics & IT Cooling Systems S.p.A.).

The newly established Product Group 'Rooftop Units' aims to complement the existing range and open up possibilities for Eurovent members to become more active in this specific manufacturing field within the Association. Rooftop units are covered by Regulation (EU) 2016/2281 with regard to Ecodesign requirements for air heating products, cooling products, high temperature process chillers and fan coil units. In light of the upcoming revision of this Regulation, PG-RT was set up on request of Eurovent members.

The Secretariat of this Product Group is provided by Mr Francesco Scuderi. He is joined by Mr Filip Konieczny of FLOWAIR as Chairman and Mr Alberto Bellù of Mitsubishi Electric Hydronics & IT Cooling Systems S.p.A. as Vice-Chairman, who have been both elected during the Group's recent half-day online session.

Mr Filip Konieczny, first-ever Chairman of PG-RT, said: "It is important to increase the awareness of the European market about the advantages and application purposes of Rooftop Units. I believe a good way to start is to accompany the revision process of the Regulation (EU) 2016/2281. I am humbled by the trust my industry colleagues put in my hands and look forward to working on this, and to developing new initiatives together."

The next meeting of PG-RT will take place on Wednesday, 03 February 2021 and will be held virtually. Participants can already register via the [Eurovent Extranet](#), where the preparatory documents will timely become available. If your organisation is not yet part of this Product Group but is interested in participating, please get in touch with the Eurovent Secretariat via [this form](#) (login required) or by emailing to secretariat@eurovent.eu.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
