Eurovent welcomes Airmaster as a new member

Brussels, Aars, 31 October 2023. Eurovent would like to extend its warm welcome to Airmaster, one of the leading Danish manufacturers of ventilation units. Their membership was approved during the association's Board of Directors meeting in September.

Established in 1991, Airmaster is a manufacturer of decentralised ventilation units with heat recovery. It is one of the market leaders within decentral ventilation with a primary market focus on school buildings, kindergartens and some working offices mainly in northern and central Europe. Located in Aars, Denmark, Airmaster has its own test centre with modern facilities such as airtight and soundproof areas.

Mr Joakim Hansen, Business Developer at Airmaster, remarked: "We have previously followed Eurovent's activities on the sideline through our activities in the Danish national association VELTEK. However, with the increasing focus on decentralised ventilation, which is happening on the European ventilation market, we believe it was the right time to become full members of Eurovent."

Airmaster has through time been an innovation hub and lighthouse for decentralised ventilation. We look forward to, together with other members of Eurovent, help set the agenda for decentralised ventilation, as we move closer and closer to EU's 2030 goal of decarbonising buildings, where sustainable ventilation technology is going to play a major factor."

Is your organisation interested in becoming a member of our globally known industry association? All relevant information is available at www.eurovent.eu. In case of any questions, contact the Eurovent Team via secretariat@eurovent.eu.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
